

eCarUp

WE MAKE ANY CHARGING STATION INTELLIGENT!

About eCarUp

eCarUp is a simple, low-cost system to manage charging points. eCarUp makes it possible to give your guests, employees, suppliers and the public access to your charging stations according to your conditions. You determine prices, availability and user groups. Any charging station from any manufacturer can be easily upgraded. Costs vary between EUR 170.00 and 370.00 depending on the chosen charging hardware.

Gastronomic businesses

Culinary establishments are ideal charging box locations. Provide your guests with this additional service while they are visiting your restaurant and bill consumption-dependent on energy. Your advantages with eCarUp at one single glance:

...simple & universal

- Manufacturer-independent
- Administration portal and free app to manage charging points
- Load management functions
- individualized user rights (e.g. for guests, employees, suppliers)
- Adjustable parking fees and energy prices
- Selectable periods of use

...low-cost & automatic

- Inexpensive acquisition
- Handily charge at other eCarUp e-stations
- Automatic money transactions
- Live data with charging history (energy, revenue, etc.)
- Integrate your solar panels – charge clean power
