WE MAKE ANY CHARGING STATION INTELLIGENT!

## About eCarUp

eCarUp is a simple, low-cost system to manage charging points. eCarUp gives your customers, employees, suppliers and the public access to your charging stations according to your conditions. You determine prices, availability and user groups directly in the App. Any charging station from any manufacturer can be easily upgraded. Costs vary between EUR 170.00 and 370.00 depending on the chosen charging hardware.

## SMB

The number of e-cars grows exponentially and along with it the need for charging stations. With eCarUp you can bill charging according to individual energy consumption. Your advantages with eCarUp at one single glance:

### ...simple & universal

- Manufacturer-independent
- Administration portal and free app to manage charging points
- Load managements functions
- Individualized user rights (e.g. for customers, employees, suppliers)
- Adjustable parking fees and energy prices
- Selectable periods of use

### ...low-cost & automatic

- Inexpensive acquisition
- Handily charge at other eCarUp e-stations
- Automatic money transactions
- Live data with charging history (energy, revenue, etc.)
- Integrate your solar panels – charge clean power
